ABOUT THIS GUIDE

What this document contains

This *Behaviour-Based Interview Guide* outlines the process for preparing for and conducting a behaviour-based interview and is designed to guide you through the interview, providing you with scripting around conducting the interview. While the interview process is quite structured, any interview still requires a personal touch. Allow your own style and personality to come through. This will help you to feel more comfortable throughout the interview and will undoubtedly have a similar impact on the candidate.

This guide includes:

- Things to consider and steps to complete before conducting interviews
- A “script” of the key points to cover in the interview
- All of the competencies for a specific role (i.e., Frontline Professionals, Frontline Supervisors, Specialized Support Workers, Clinical Specialists, Managers and Directors)
- A list of behaviour-based – *targeted* – interview questions for each competency
- Space for taking notes during the interview
- An Interview Summary to capture the interviewer’s assessment of the candidate following the interview

The behaviour-based interview process requires in-depth knowledge of both the technique itself, as well as the competencies and the behavioural scales against which you will evaluate the data you gather from the candidate.

PRE-INTERVIEW PREPARATION

Considerations when preparing to conduct behaviour-based interviews

Before conducting interviews, there are two key steps:

1. First, you need to define the requirements for the position for which you are hiring.
2. You then need to design the selection process.

Each of these steps is described below. Once you've completed these two steps, you will have the information required to begin the interview process.

Step 1: Define the job requirements

Determining the job requirements involves defining the following:

- What are the key accountabilities for the position?
- What are the credentials, qualifications and/or educational requirements you are seeking in the candidate?
- What technical skills are required?
- What experience, if any, is required?
- Which competencies are required for the position?

It is helpful to refer to the job description for the position, and also to think about your experience with other employees who have worked successfully in this or similar positions (i.e., in terms of the qualities, experiences, education and characteristics that made those individuals successful). You may also want to refer to the job posting.

This step will give you a clear picture of the position – the requirements for success in the position.

PRE-INTERVIEW PREPARATION, CONTINUED

Step 2: Design the selection process

The selection process is a multiple hurdle process. The key is to use broad, less costly assessment methods to pre-screen candidates (e.g., application forms, self-assessment questionnaires, resume screening, cognitive ability tests), and then to use more specific (and typically more labour intensive) assessment methods to assess the competencies and capabilities of candidates (e.g., behaviour-based interviews, work simulations).

Decide on the selection process you will use, ensuring it is aligned with the process, guidelines and policies of the agency.

This step involves:

- Identifying who will be on the hiring team
- Determining the screening process
- Determining the interview process, including:
 - How many interviews will be conducted with candidates?
 - Who will conduct the interviews?
 - What will be the length of the interviews (e.g., 90 minutes, 2 hours)?
 - Which competencies will be covered in the interview and/or by each interviewer? (If conducting multiple rounds of interviews, you will need to determine which competencies will be explored in each round.)
 - As a guideline, you will need approximately 10-15 minutes to explore each competency. Therefore, in a 90-minute interview (with 60 minutes of that time devoted to the behaviour-based component), you will likely be able to cover 4-6 competencies. The more senior the position, the more time you will require per competency as the situations the candidates share will likely be more complex, and therefore, will require more time to explore.
 - If you choose to select a threshold competency, determine an appropriate target level for the position for which you are hiring.
 - Which targeted questions you will ask from the list of questions provided. It is recommended that you ask a minimum of two questions per competency to ensure a more in-depth understanding of the candidate's ability to demonstrate the behaviours associated with the competency. Refer to the competencies and the target levels for the position to help you determine the most suitable questions that you feel best apply to the position.
 - Who will set up the logistics of the interview process?
 - Will there be any additional assessments or testing required as part of the interview process (e.g., psychological or personality assessments, writing tests, etc.)?
- Arranging a meeting of the hiring team to evaluate candidates and make a selection decision
- Planning the reference check process and any other pre-employment checks

When you have designed the process, ensure all interviewers are briefed.

PHASES OF THE INTERVIEW

The four phases of the interview

The *Behaviour-Based Interview Guide* takes you through the four phases of the interview:

PHASE	ACTION
1	Preparing for the interview.
2	Conducting the interview.
3	Assessing the candidate.
4	Making a selection decision.

PREPARING FOR THE INTERVIEW

Preparation checklist

Use the following checklist to prepare for an interview:

STEP	ACTION	DONE
1	Schedule the interview with the candidate. Note: Try to schedule enough time to conduct the interview <i>and</i> evaluate the data following the interview (if possible). This will depend on the number of competencies to explore with the candidate, and, if possible, time to “code” the data provided by the candidate. (Alternatively, you may want to code the data at another time.)	
2	Reserve a room in a quiet area to conduct the interview.	
3	Record the candidate’s name, your name, and the date and location of the interview on the front of the Interview Guide.	
4	Review each competency you will be targeting in the interview – the definition and behavioural scale – to ensure you have a clear understanding of the competency, focusing on the target level for the role so that you can focus your probing. Note: If you have selected a threshold competency, identify an appropriate target level for the position.	
5	Review the prepared “script” in the <i>Behaviour-Based Interview Guide</i> . Remember, the script is a guide – use your own language to give it your personal touch.	
6	Review the position/job description.	
7	Review the candidate’s resumé and application.	
8	Ensure you have a pen/pencil and paper on hand to take notes when conducting the interview.	
9	Have water and/or coffee/tea available for both you and the job candidate.	

CONDUCTING THE INTERVIEW

The interview – key steps

Summarized below are the steps to follow during the interview. Each step is described in more detail on subsequent pages.

STEP	ACTION
1	Open the interview: Be on time for the interview. Greet the candidate, establish rapport and explain the purpose of the interview.
2	Review the candidate's career history: Ask the candidate to review their career history, focusing on the key transitions. Have the candidate outline the key/relevant responsibilities in each job, particularly those that are relevant to the role for which you are hiring.
3	Conduct the behaviour-based interview: <ul style="list-style-type: none">• Provide the candidate with detailed instructions on how this component of the interview will work• Begin with the first competency and ask the targeted selection question• Ask focused probes• Take thorough notes
4	Ask any final questions: This is your opportunity to explore any final questions you may have that you may have thought of during the course of the interview.
5	Give the candidate an opportunity to ask questions: Allow the candidate to ask questions about the job/position, the organization, and any other relevant issues.
6	Close the interview: Close the interview by explaining the next steps in the recruitment and selection process.
7	Evaluate the candidate: Assess the candidate's responses immediately following the interview, if possible, and complete the summary page at the back of this guide.

1. OPEN THE INTERVIEW

Build rapport

Use the opening to build rapport and make the candidate feel at ease by making small talk. This should only take about 2-3 minutes at the start of the interview.

1. Begin by introducing yourself and your role.
2. Help put the candidate at ease by asking a question – some examples include:
 - Did you have any problems finding our office today?
 - Have you visited our location before?
 - Have you been following _____ (a global event, for example, the Olympics – something that cannot be construed as political or religious)?
 - Would you like some coffee or a glass of water?
 - Are you enjoying the weather?

3. Explain the purpose and structure of the interview:

The purpose of this interview today is to determine whether there is a match between your interests and capabilities for the role.

To enable our organization to make the best decision, I'll be asking you to spend a few minutes talking about your previous work-related experience and career history. Then, I'll ask you about some events or situations where you played a key role. I'd like you to focus on situations that occurred within the past 1-2 years and are most relevant to your work. It's much easier to recall recent events than events that occurred in the distant past.

If, at any time, you don't understand a question, let me know.

4. Mention timeframe for the interview.

We will have approximately __ hours to conduct the interview.

5. Mention note-taking and interruptions during the interview.

I'll be taking detailed notes during the interview so that I'll be able to remember all the information that you share with me.

Then, once I've asked you our questions, I'll give you an opportunity to ask me any questions that you may have about the job or organization, or add additional information that you consider important for me to know.

Do you have any questions before we get started?

2. REVIEW THE CANDIDATE'S CAREER HISTORY

Review the candidate's work-related experience and career overview

Review the candidate's career history and key job responsibilities. As you hear evidence of technical skills, probe for more information about the candidate's technical knowledge and expertise. Here are examples of an introductory statement and some follow-up questions.

"I'd like to discuss your career history. Let's start with your most recent position. Why don't you give me a sense of the major things you've done and are accountable for?"

Questions to ask:

- What is/was your position?
- What are/were your responsibilities?
- Do/did you have any direct reports? If so, how many?
- What key skills are/were required in the job?
- What technical abilities do you possess that you feel are relevant to this job?
- How have you demonstrated these skills?
- Do you have any other educational accomplishments that are not indicated on your resumé?
- Which of your previous positions do you feel has most prepared you for this job?
- Do you have any additional credentials that you feel are relevant to this job?

Explore any gaps in employment.

Note: While exploring the candidate's career history, remember to ask the candidate what caused them to make the job choices they did along the way, as relevant.

Notes:

2. REVIEW THE CANDIDATE'S CAREER HISTORY, CONTINUED

Notes:

3. CONDUCT THE BEHAVIOUR-BASED INTERVIEW

Explain the process

Transition to the behaviour-based component of the interview and explain the process as follows:

1. *We're now going to move into the behaviour-based part of the interview. The purpose of this phase of the interview is to gather information about you and how you do your job to really get a more detailed understanding of the behaviours you use to get things done, and determine how well these match to the behaviours required for the role you have applied for. This will give us insight into the competencies you've demonstrated in the past, because our approach is based on the premise that what you've done in the past is the best predictor of what you're likely to do in the future.*
2. *I'm going to ask you to **share several situations or events from current or past work experience**, depending on our time. Once again, these should be situations that have happened in the recent past – ideally within the last 1-2 years – and should be ones where you were principally involved.*
3. *I'll ask you to tell me about the situations in a very specific way. For each situation:*
 - *I'll first ask you to describe in a **2-3 sentence overview** the **context** of the situation – the essence of the situation and what led up to it.*
 - *Then I'll ask you to walk me through the situation in detail, describing the **actions** you took in that situation. I want to be able to understand what it is you did, said, thought and felt as if I were there with you.*
 - *Finally, I'll ask you for the **results/outcome** of the situation – how did it end up?*
 - *As you tell your stories, I'm likely to interrupt you from time to time because, again, I'm looking for a certain type of information. For this reason, **I'll likely be interrupting you quite frequently** to gather this detail, so I apologize in advance.*
 - *The most important thing I'll ask you to do is to **talk in the first person – to focus on "I" instead of "we"**. It's critical that I know exactly what you said, did, etc. So, whenever you use "we", I'll again interrupt you to remind you to focus on exactly what it was that you said, did, etc.*
 - *Do you have any questions before we get started?*

**Turn the page and begin
the behaviour-based portion of the interview.**

ADVOCATING FOR OTHERS

Individuals demonstrating the competency “Advocating for Others” show through their behaviours an inclination to champion a cause or issue and try to get others to support it (i.e., trying to win the support of others).

_____	<p>1. States facts to persuade or motivate:</p> <ul style="list-style-type: none"> • Uses direct persuasion in a discussion or presentation. • May appeal to reason, data, others’ self-interest. • May use concrete examples, visual aids, demonstrations, etc. • At this level, focuses on fact but makes no apparent attempt to adapt presentation to the interest and level of the audience (adapting presentation or language is level 3).
_____	<p>2. Takes multiple actions to persuade:</p> <ul style="list-style-type: none"> • Makes two or more <i>different</i> arguments or points in a presentation or a discussion. • Takes two or more steps to convince. Includes careful preparation of multiple sets of data for presentation (e.g. may use both statistics and actual examples).
_____	<p>3. Calculates impact of actions or words:</p> <ul style="list-style-type: none"> • Adapts a presentation or discussion to appeal to the interest and level of others. • Anticipates the effect of one’s words or actions on others’ perceptions of himself/herself. • Takes a well-thought-out dramatic or unusual action in order to have a specific impact. • Anticipates and prepares for others’ reactions.
_____	<p>4. Uses indirect influence:</p> <ul style="list-style-type: none"> • Uses chains of indirect influence: “get A to show B so B will tell C such-and-such”. • Takes two or more steps to influence, with each step adapted to the specific audience. • Anticipates areas where support or influence will be required and takes steps to add these key individuals to own network. • Judges when to seek support to enlist the involvement of credible resources/objective experts to bolster arguments or improve buy-in of reluctant or resistant people. • Solicits and engages the support of like-minded individuals to help convince others. • Uses experts or other third parties to influence. • Sounds out key decision-makers and influencers prior to meetings. • Uses a combination of logical argument, personal conviction and passion to create a winning case.
_____	<p>5. Uses complex influence strategies:</p> <ul style="list-style-type: none"> • Uses an in-depth understanding of the interactions within a group to move toward a specific agenda (e.g., may give or defer information among individuals to have specific effects); uses “group process skills” to lead or direct a group. • Assembles political coalitions; uses complex manoeuvring to reach a goal or have an effect. • Builds “behind the scenes” support for ideas. This may include building support within the Board for management suggestions. • Builds and continuously maintains a network of contacts and resources to support initiatives.

Targeted questions

Identify which targeted competency questions you will ask:

- Tell me about a time when you had to convince an individual or group of an idea, position or approach.
 - Describe a recent situation in which you convinced an individual or a group to do something.
 - Can you tell me about a time when you had to take several steps to persuade an individual or group?
 - Tell me about a time when you had to sell an idea to several individuals or groups.
 - Describe a time when you considered others' perspectives in your efforts to convince or persuade them.
 - Tell me about a time when you used multiple influence strategies to achieve an outcome.
 - Tell me about a time when you used a complex influencing strategy to create a desired impression or impact, or to reach a goal.
 - Can you describe a situation when you used a highly sophisticated influencing strategy to bring about sustainable change?

CREATIVE PROBLEM SOLVING & DECISION MAKING

Creative problem solving and decision making is the demonstration of behaviours that enable one to identify and solve problems by understanding the situation, seeking additional information, developing and weighing alternatives, and choosing the most appropriate course of action given the circumstances. Problems can be solved by breaking the issue into smaller pieces or by identifying patterns or connections between situations that are not obviously related. It involves the willingness to and demonstration of behaviours associated with taking a creative approach to problems or issues. It includes “thinking outside of the box”, to go beyond the conventional, and to explore creative uses of resources.

_____	<p>1. Uses a common sense approach to solve problems:</p> <ul style="list-style-type: none"> • Uses simple rules, common sense and past experiences to recognize problems. Responds to situations at face value. • Identifies component parts of problems or situations. • Breaks problems down into simple lists, activities or tasks, without assigning values or priorities. • Sees single causal links between components of a problem/situation (e.g., “if this, then that” thinking).
_____	<p>2. Is open to new ideas/solutions:</p> <ul style="list-style-type: none"> • Is open minded when presented with a new perspective. • Applies new information to work problems and situations. • Recognizes when a situation calls for or can be improved by an approach different from the usual.
_____	<p>3. Understands and acts on basic relationships:</p> <ul style="list-style-type: none"> • Breaks down a problem/issue into its component parts. • Identifies discrepancies, trends and interrelationships in data. • Recognizes and acts on cause and effect relationships (A leads to B). • Recognizes that problems may be multi-dimensional. • Divides issues into categories (e.g., pros and cons). • Looks behind the face value of a set of facts; understands less obvious implications. • Uses knowledge and/or experience to understand, evaluate and solve problems/issues.
_____	<p>4. Identifies and considers options to solve a problem or issue:</p> <ul style="list-style-type: none"> • Generates multiple alternative solutions. • Thinks imaginatively in order to develop creative solutions or options for which there are few or no precedents. • Thinks “outside of the box” to identify new solutions. • Evaluates alternative solutions and identifies and acts on the optimum course of action. • Is prepared to try out different solutions while maintaining a safe environment. • Recognizes underlying issues and the implications of decisions or courses of action.
_____	<p>5. Solves complex problems:</p> <ul style="list-style-type: none"> • Solves complex problems that may involve using several analytical or creative techniques to break the problem down into component parts or issues. • Applies complex learned concepts when examining patterns or trends. • Adapts existing frameworks to approach a situation from a different perspective. • Examines potential implications of decisions/solutions on all affected stakeholder groups, which may include several areas/departments across the agency.

LEADING OTHERS

Leading Others is about taking on the role of leader of a team or other group. It involves providing inspiration, clarity and direction through a compelling vision of the future. This includes ensuring that those who are led work together and are provided with the required resources and motivational support. Leaders measure their success through the success of others.

4. ASK ANY FINAL QUESTIONS

Ask any final questions or gather additional information

Ask the candidate any final questions you may have and note his/her responses.

Notes:

5. GIVE THE CANDIDATE AN OPPORTUNITY TO ASK QUESTIONS

Ask if the candidate has any questions

Give the candidate an opportunity to ask questions about the job/role, the organization or any other relevant issue.

“Thank you for the detail you’ve provided. This will help us make a selection decision. Do you have any questions you’d like to ask of me?”

Notes:

Ask if the candidate has additional information to provide

Before closing the interview, ask if the candidate has any other information they would like to share.

“Before we close the interview, is there anything else you would like to share?”

Notes:

6. CLOSE THE INTERVIEW

Review next steps and close the interview.

Review the next steps and timing with the candidate. Thank the candidate for his/her time.

“Thank you for your time today and your interest in the position. We will review all of the information provided, and will likely make a selection decision in the next couple of weeks. We will be in touch with you by _____ (specify a date, if possible).”

7. EVALUATE THE CANDIDATE

Guidelines for evaluating the candidate

Immediately upon finishing the interview (if possible), take time to review your notes and finalize your behavioural rating for each competency. Below are some guidelines for evaluating candidates.

1. Review all of your notes and code the data – look for behavioural evidence that best matches a specific competency level. Be conservative where you feel you don't have enough supporting evidence (i.e., rate the candidate at a lower level rather than giving him/her the benefit of the doubt).
 2. Indicate the level you have chosen for each competency on the Summary Page at the back of the Interview Guide. The level you select should reflect the level that the candidate demonstrated most of the time (i.e., on a consistent basis across all situations).
 3. Compare your assessment of the competency level demonstrated to the target level for the position to give you a good understanding of the candidate's competency strengths and areas for development.
 4. When evaluating the candidate, take into consideration the following:
 - Business priorities
 - The candidate's ability to develop
 - The size of the gaps
 5. Do not compare thoughts about a candidate with other interviewers (if applicable) until everyone has completed their evaluation.
